Subject: Motivation Letter – Application for Surveyor Position and Request for Transfer Sponsorship

Dear Hiring Manager,

I am writing to express my sincere interest in joining your organization as a Land Surveyor / Surveyor Assistant. I hold a Diploma in Surveying Technology and have practical field experience through my work with the Institute of Water Modelling (IWM), Bangladesh, as well as surveying and site-related experience on a Metro Rail Project.

At present, I am working in Saudi Arabia with SASCO. I joined this opportunity at a difficult stage of my financial life. When I came to Saudi Arabia, I was under significant financial pressure, and therefore I had to accept the employment opportunity that was available to me at that time. My priority was to come to Saudi Arabia, support myself financially, and build a better future for my family.

I am grateful for the opportunity that SASCO provided me, including the support related to my Iqama and air ticket. However, my current position is primarily related to store operations and does not match my educational background or long-term professional career in surveying. As a result, I strongly wish to return to my actual professional field and develop my career as a Surveyor in Saudi Arabia.

I understand that transferring from my current employment may involve a cost of approximately SAR 10,000, particularly because my current company has incurred expenses related to my Iqama and air ticket. I am therefore looking for an employer who may be willing to support this cost as part of my recruitment and transfer arrangement.

I would sincerely appreciate it if your company could consider covering the SAR 10,000 transfer/release-related cost, if applicable, so that I can join your organization and begin working in my professional field.

I believe this would be a mutually beneficial opportunity. Your organization would gain a motivated employee with formal training in surveying, practical field exposure, experience working in a structured and multicultural environment, and a strong willingness to learn and contribute. In return, I would have the opportunity to build a long-term career in the profession for which I was educated and trained.

I am particularly interested in developing my skills in areas such as land surveying, construction surveying, site measurements, setting out, survey documentation, field data collection, and infrastructure projects. I am hardworking, adaptable, safety-conscious, and willing to work under challenging site conditions. I am also committed to improving my technical skills and contributing positively to the organization.

I respectfully request you to consider my situation and give me an opportunity to discuss the position and transfer arrangements. If your company is willing to support the required transfer cost, I would be highly motivated to join and build a long-term professional relationship with your organization.

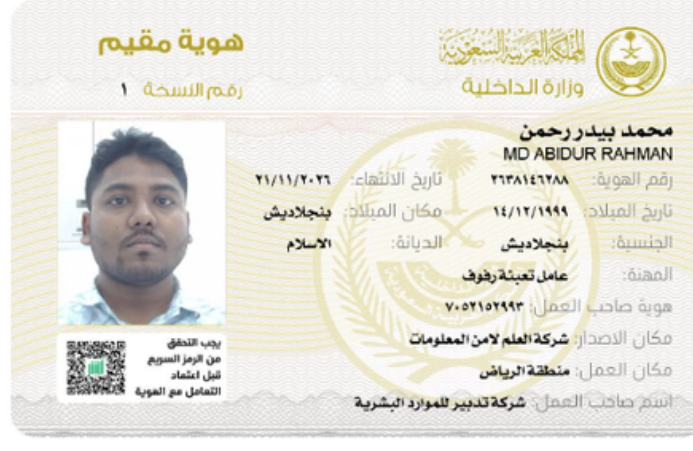

Thank you very much for considering my application. I look forward to the opportunity to discuss how my education, field experience, and commitment can contribute to your team.

Yours sincerely,

MD Abidur Rahman
